PROFILE

I am currently a final-year undergraduate pursuing a Software Engineering degree at the Informatics Institute of Technology (IIT), affiliated with the University of Westminster. I have a deep enthusiasm for learning new things and staying in touch with the latest technologies. I have recently begun exploring the field of Natural Language Processing (NLP) and am developing a strong interest in it. Beyond academic and professional pursuits, I believe in the importance of inspiration, and enjoy writing to bring a sense of motivation to others.

SKILLS

Languages & Frameworks

Python, Flask
Angular, TypeScript
Java
Web Design (HTML, CSS,
JavaScript, ReactJs)
Dart, Flutter
SQL, PL/SQL

Technologies & Tools

Pytorch, Scikit-learn
Pandas, NumPy
NetworkX, Matplotlib,
NLTK
Gradio
Docker, Github, Hugging
Face Transformers

EDUCATION

University of Westminster - IIT | 2023 - Present

BEng (Hons) Software Engineering | Final year

Key modules: Machine Learning, Data structures & Algorithms, Operational research & Optimisation, Concurrent Programming, Formal Methods, Database Systems, Mathematics for computing

Research Project: NLP (Automatic Text Summarisation)

Informatics Institute of Technology | May 2022 - Dec 2022

Foundation Certificate in Higher Studies

Grade : Distinctions

Brilliant Stars Int. College

2019 O/L

EXPERIENCE

IFS - Experience Framework Division

July 2024 - June 2025

Technologies: Angular, Typescript, PL/SQL

- Contributed to defect fixing and small-scale feature enhancements for enterprise applications using TypeScript and Angular
- Participated in unit and Cypress testing, and supported backward compatibility and service update testing within agile development workflows.
- Worked with PL/SQL and internal IFS technologies

PUBLICATIONS

SinhaLegal : A Benchmark corpus for Information Extraction and Analysis

March 2026

Co-Author: Nevidu Jayatilleke

Publication Venue: The Second Workshop on Language Models for Low-Resource Languages (LoResLM)

Paper: <https://aclanthology.org/2026.loreslm-1.11/>

PROJECTS

SinBrief: Sinhala Legal Text Summariser | University of Westminster /IIT | Final Year Project

Sep 2025 - May 2026

A summariser which summarises Sinhala legal documents. This was carried out in an unsupervised methodology due to the lack of datasets available. This project resulted in a Sinhala Legal dataset and a trained Llama 3.1 for domain-specific knowledge

Technology: Gradio, Python (scikit-learn, pytorch, numpy), Trained and fine-tuned LLMs

SignWave - ASL Translation App | University of Westminster/ IIT | Group work**Oct 2023 -March 2024**

A mobile application for deaf individuals to translate English into ASL. This app's unique feature is allowing the hearing impaired to be able to view ASL captions for videos (YouTube and Downloaded). It also contains text, pdf files, scan docs to ASL and ASL to English translations as well

Technology : Dart (Flutter), Python (Flask), MySQL

Machine Learning & Data Mining Project | University of Westminster/IIT | Individual**Feb 2024 -May 2024**

Implemented machine learning models in R, including K-means clustering and MLP neural networks, for pattern discovery and time-series forecasting on real-world datasets.

Technology : R

Algorithms & Data Structures Project| University of Westminster/ IIT | Individual**March 2024 - April 2024**

Designed and implemented a pathfinding algorithm to solve a sliding puzzle, including custom data structures, file parsing, and shortest path computation with performance analysis using Big-O notation

Technology : Java

Tourism Website | University of Westminster/ IIT | Group work**April 2023 -July 2023**

A Website made for tourists with all the information about Sri Lanka

Technology : HTML , CSS, JavaScript

Student Progress Predictor | University of Westminster/ IIT | Individual**March 2023 -April 2023**

A system which predicts the outcomes of their academic grades based on their completed number of credits .

Technology : Python

CERTIFICATIONS

NLP for speech and text**Ongoing**

LinkedIn course by wuraola oyewusi, which covers the basics of NLP to it's advance stages

IFS Cloud Software Engineering Program**July 2024**

Completion of the Software Engineering training program held by IFS

JavaScript Essential Training**Feb 2024**

LinkedIn course by Morten Rand Hendriksen which covers all the essentials for JavaScript

Java Essential Training : Objects and APIs**Sep 2023**

LinkedIn course by Angie Jones

Machine Learning with python : Foundations**Sep 2023**

LinkedIn course by Fredrik Nwanganga, which covers the fundamentals of Machine learning

Java object- oriented programming**Aug 2023**

LinkedIn course by Kathryn Hodge. This course consisted of the OOP concepts with Java

COMPETITIONS

Mora UXplore 2.0**March 2024 - July 2024****CodeSprint****Feb 2024 - July 2024****Problem-Solving International Hackathon****Feb 2024****Idealize Competition****Sep 2023**

EXTRA CURICULAR

Member: Secretarial team

IET on Campus IIT

Feb 2025 - Present

Content Writing, Copy-editing

Volunteer - Secretarial team

RobotNexus 3.0

IEEE Robotics and Automation Society

Feb 2026 - Present

Volunteer - Secretarial team

IndustPro 3.0

IEEE Computer Society

Feb 2024 - Jul 2024

Member | Leo club of IIT

May 2023 - May 2025

Social Services

Volunteer - Editorial team

Stage Craft 2024

Feb 2024 - March 2023
