PROFILE

I recently completed my Software Engineering degree at the University of Westminster (UK), with First Class Honours. I am currently employed as a junior full stack developer in the AI/ML team at Nexus AML. During my academic studies, I worked with Software Engineering, Natural Language Processing, and areas of Machine Learning & Artificial Intelligence, which sparked my interest in research and emerging technologies. Beyond academics and work, I enjoy writing to share knowledge and inspire others.

EXPERIENCE

Nexus AML | Junior Full Stack Developer | AI/ML Team

Sept 2026 - Present

Technologies: NextJs, Python, AWS

Gitconnected | Technical Writer / Contributor

July 2026 - Present

- Write technical articles on AI, ML, NLP, software engineering, and related technologies.

Medium Account - <https://medium.com/@mindulilasandi>

IFS | Trainee Software Engineer | EXFW Division

July 2024 - June 2025

Technologies: Angular, Typescript, PL/SQL

- Contributed to defect fixing, feature enhancements and developments for enterprise applications using TypeScript and Angular
- Performed unit and Cypress testing, including backward compatibility and service update testing within Agile workflows.
- Worked with PL/SQL and internal IFS technologies (Marble)

PUBLICATIONS

SinhaLegal : A Benchmark corpus for Information Extraction and Analysis

March 2026

Co-Author: Nevidu Jayatilleke

Publication Venue: The Second Workshop on Language Models for Low-Resource Languages

(LoResLM)

Paper: <https://aclanthology.org/2026.loreslm-1.11/>

SINBRIEF: An Unsupervised Framework for Abstractive Text Summarisation of Sinhala Legal Documents

Accepted

Co-Author: Nevidu Jayatilleke

Publication Venue: The 38th Conference on Computational Linguistics and Speech Processing (ROCLING 2026)

Pre-print - <https://arxiv.org/abs/2609.32397>

EDUCATION

University of Westminster | UK

Jan 2023 - May 2026

BEng (Hons) Software Engineering

Grade: First Class Honours

Key modules: Machine Learning, Data Structures & Algorithms, Operational Research & Optimisation, Concurrent Programming, Formal Methods, Database Systems, Mathematics for Computing, OOP

Research Project: NLP, Legal Domain, Low-Resource Languages (Automatic Text Summarisation)

Informatics Institute of Technology | Sri Lanka

May 2022 - Dec 2022

Foundation Certificate in Higher Studies

Grade : Distinctions

Brilliant Stars Int. College | Sri Lanka

Jan 2015 - Dec 2019

O/L Examinations

SKILLS

Research Skills

Software Engineering
Machine Learning, Neural Networks
Natural Language Processing, AI
Fine-tuning/pre-training LLMs
Corpus creation, Model Evaluation
Academic writing

ML / NLP Libraries

Pytorch, Scikit-learn
Pandas, NumPy,
NLTK
NetworkX, Matplotlib
Hugging Face Transformers

Languages& Tools

Python, Flask, Flutter, SQL
Java, JavaScript,TypeScript
Angular, React, NextJs
Gradio, Google Colab
Google Document AI

PROJECTS

SinBrief: Sinhala Legal Text Summariser | University of Westminster /IIT | Final Year **Sep 2025 - May 2026**
Project

A framework which summarises Sinhala legal documents. This was carried out using an unsupervised methodology due to the lack of available datasets. This project resulted in a new Sinhala Legal dataset, a continually pre-trained Llama 3.1 model for domain-specific knowledge, and fine-tuned models to select the best fit for the framework. | Project - [Link](#)

Technology: Python (scikit-learn, pytorch, numpy), Trained and fine-tuned LLMs (Llama 3.1, Laser, Bert, Falcon)

SinhaLegal (Sinhala Legal Dataset) | University of Westminster /IIT | Final Year Project **July 2026 - Dec 2026**

A domain-specific Sinhala legal text corpus containing approximately 2 million words across 1,206 documents. Collected, cleaned, and structured legal documents and evaluated dataset quality using linguistic and NLP-based analyses (NER, Topic modelling, WER & CER, perplexity analysis, hapax legomenon etc.) to support future research in Sinhala NLP.

Technology: Python, Google Document AI (OCR), post-processing, NER, Topic Modelling | Project - [Link](#)

SignWave - ASL Translation App | University of Westminster/ IIT | Group work **Oct 2023 -March 2024**

A mobile application for deaf individuals to translate English into ASL. This app’s unique feature is allowing the hearing impaired to be able to view ASL captions for videos (YouTube and Downloaded). It also contains text, pdf files, scan docs to ASL and ASL to English translations as well.

Technology : Dart (Flutter), Python (Flask), MySQL | Project - [Link](#)

Machine Learning & Data Mining Project | University of Westminster/IIT | Individual **Feb 2024 -May 2024**

Implemented machine learning models in R, including K-means clustering and MLP neural networks, for pattern discovery and time-series forecasting on real-world datasets.

Technology : R | Project - [Link](#)

Algorithms & Data Structures Project| University of Westminster/ IIT | Individual **March 2024 - April 2024**

Designed and implemented a pathfinding algorithm to solve a sliding puzzle, including custom data structures, file parsing, and shortest path computation with performance analysis using Big-O notation

Technology : Java | Project - [Link](#)

CERTIFICATIONS

Foundational math for Machine Learning **August 2026**

A learning path covering essential mathematical foundations for machine learning, including linear algebra, calculus, probability, and statistics.

NLP for speech and text **June 2026**

LinkedIn course by wuraola oyewusi, which covers the basics of NLP to it's advance stages

IFS Cloud Software Engineering Program **July 2024**

Completion of the Software Engineering training program held by IFS

Machine Learning with python : Foundations **Sep 2023**

LinkedIn course by Fredrik Nwanganga, which covers the fundamentals of Machine learning

EXTRA CURRICULAR

Volunteer - Secretarial team | IEEE Robotics and Automation Society **Feb 2025 - Present**

Events: RobotNexus 3.0, MicroMaze 3.0, IEEE Section Awards

Contribution: Content/Script Writing, Copy-editing, Writing reports & MOUs

Member: Secretarial team | IET on Campus IIT **Feb 2025 - Sept 2026**

Events: IET Summer School, IET Cipher, IET Cipher 2.0

Contribution: Content Writing, Copy-editing

Volunteer - Editorial team | IEEE Computer Society **Feb 2024 - July 2024**

Event: IndustPro 3.0

Contribution: Content/Script Writing, Copy-editing

Volunteer - Editorial team | Student Union IIT **Feb 2024 - April 2024**

Event: Stage Craft 2024

Contribution: Content Writing, Copy-editing

REFEREES

Nevidu Jayatilleke
Postgraduate Researcher at University of Moratuwa

+94 71 - 251 4638

nevidu.25@cse.mrt.ac.lk

Lakmal Godamunna
Senior Lead Software Engineer at IFS

+94 77- 264 3790

lakmal.godamunna@ifs.com
